## **AXA** HOME SECURITY

**WITH A HISTORY GOING BACK 110 YEARS, AXA IS AN AUTHORITY IN SUPPLYING DOOR AND WINDOW FITTINGS AND HAS BUILT UP AN EXCELLENT NAME FOR ITSELF IN THE FIELD OF BURGLAR-PROOF SECURITY PRODUCTS.**

As specialists with knowledge of door and window fittings, AXA offers good and fast solutions. Every day a team of specialists works on the development, production and marketing of AXA quality products - quality that is demonstrated in the materials used, the dimensional stability, the finish and the lifespan of the products. But also the quality you see in delivery reliability, extensive documentation and expertise of our staff.

Luckily there's AXA

## WHY OUR SECURITY STRIPS **ARE THE BEST** SOLUTION

Burglars are constantly coming up with new ways of breaking into your home, such as the so-called “**credit card technique**”. This method involves using a hard piece of plastic to push the latch out of the lock from the outside. Prying the door open with force using a crowbar or screwdriver is another common technique. But something needs to be done **to stop this from happening!** AXA's security strips protect your home against the most modern burglary methods.

### **VERY SECURE**

AXA's security strips are very secure and withstand the latest burglary methods. All products meet the requirements of the Police Hallmark for Safe Living.

### **SPECIAL OFFERS**

The security strips can be ordered in all RAL colours.

# DESIGNLINE

## THE SECURE AND ATTRACTIVE SOLUTION

### High-quality

AXA's security strips are made from high-quality aluminium, making them rustproof. Their innovative design makes AXA's security strips at least as sturdy as steel strips that are currently available on the market.

### Complete range

AXA provides a complete and all-encompassing range for both front and back doors. All strips come in the colours aluminium (natural) and white. The strips can also easily be trimmed to the required length. For outward-opening doors and back doors, different types are available that are suitable for all sizes of window frames and doors up to a maximum height of 235 cm.

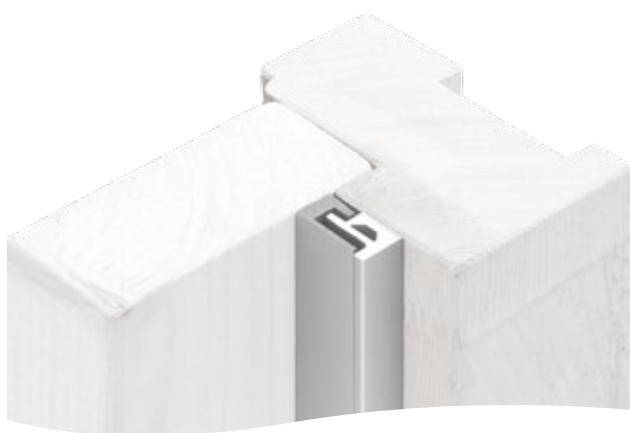

### Easy to mount without looking

AXA's security strips are unique because they are easy to mount without looking. The supplied screws are easy to access and don't need to be screwed obliquely. Because there's no need for anti-burglary screws (single-revolution screws), the strips are also easy to dismount once again, which is useful when making changes to your door or when you want to replace your door.

## INWARD-TURNING FRONT DOOR

The AXA Designline (M2) is characterised by its sleek and slim design. Once the Designline has been mounted, it is concealed almost entirely within the frame. Its smart design means that the Designline is easily able to measure up to existing alternatives on the market in terms of strength and security. The screws are invisible, of course, making the Designline look even more relaxed overall.

### WHY CHOOSE AXA SECURITY STRIPS

- ✿ Clear and all-encompassing range
- ✿ Certified according to the latest burglary methods!
- ✿ Easy to tailor-make, quick mounting
- ✿ No single-revolution screws, the screws are always concealed and cannot therefore be accessed

## OUTWARD-TURNING BACK DOOR

The AXA Designline (M3) for back doors is also characterised by its sleek design. The way in which the screws are covered is unique. They are covered with aluminium covering strip, which is slid over the screws from the side after mounting. Compared to other products on the market, you therefore never need to remove the door from its frame in order to insert a covering strip from the bottom or top.

The covering strip for the screws is simply inserted from the side and secured using Allen keys.

**QUALITY** THAT IS DEMONSTRATED  
IN THE MATERIALS USED, THE  
DIMENSIONAL STABILITY, THE FINISH  
AND THE LIFESPAN OF THE PRODUCT

AXA'S **FOUR LEAF CLOVER** STANDS FOR AXA'S **FOUR GUARANTEES** THAT YOU HAVE COME TO EXPECT FROM ALL AXA PRODUCTS
